

Review Questions
Dr. Giacomelli Lecture-Part 2:
Greenhouse Systems for Plant Production

1. What is fan staging and when would it be used?
2. How do you determine how much fan capacity is needed?
3. What would fan capacity be for maximum cooling of an 11,000 sq ft greenhouse?
4. Where should air inlets be in relation to fans? Why?
5. Which gets more ventilation, a tall or short naturally ventilated greenhouse?
6. When using evaporative cooling, which results in more cooling, humid or dry air?
